This seminar is aimed at engineers from both the electrification and permanent way disciplines. Increasing knowledge in this key, complex area is vital as the industry moves forward.

SPEAKERS FROM

SPL Powerlines, Network Rail, LEEPS,
Amey Sersa and VolkerRail

TOPICS INCLUDING

- Bedford to Kettering electrification
- Challenges of a newly electrified railway
- Liverpool Lime Street and Par Electrification
- Developments in 25kV isolation and earthing
- Developments in earthing and bonding
- Electrical clearances to structures
- Trans Pennine Route Upgrade
- The sponsors view – how the engineering community can help

Sponsored by

 **VolkerRail**

PWI SEMINARS - FEEDBACK FROM OUR DELEGATES

Outstanding level of knowledge and experience and the enthusiasm, clarity and dedication of the speakers.

Excellent timekeeping and efficient organisation.

Great Q&A sessions with a good rapport between delegates and speakers.

As always at PWI seminars - brilliant networking opportunities and knowledge exchange.

Interesting and diverse subject topics presented professionally by all of the speakers.

This is my first PWI engineering conference and I really enjoyed the whole experience.
